## **DensDefy™ Accessories Now Available on Amazon.com**

(ATLANTA) – Georgia-Pacific Building Products, a company dedicated to developing the highest-quality products while leading with a tireless commitment to innovation, is now offering DensDefy™ Liquid Flashing and DensDefy™ Transition Membrane products on Amazon.com.

Introduced earlier in 2020, DensDefy™ Liquid Flashing and DensDefy™ Transition Membrane products complete the DensElement® Barrier System by taking proprietary moisture management further and elevating the envelope to ensure performance compatibility. DensElement® Barrier System, in combination with DensDefy™ Accessories, creates a strong, continuous WRB-AB system.

Two DensDefy™ Accessories are available on Amazon now: 20 oz. DensDefy™ Liquid Flashing sausages, and DensDefy™ Transition Membrane rolls which come in widths of 6”, 9” and 12”. Both products may be ordered as a single unit, or in small quantities to complete an in-process project. For Amazon Prime customers, quick and convenient shipping means the product will arrive at their job site within 1-2 days, depending on location. No minimum order required.

“As a company, we are focused on providing flexibility and access to product options to our customers,” said Jason Peace, vice president of marketing for Georgia-Pacific Building Products. “Offering DensDefy™ Accessories on Amazon allows customer projects to move forward on time and schedule.”

DensDefy™ customers can be divided into three groups: For contractors planning a future project with DensDefy™ Accessories; or for contractors on an active job site who have run out of DensDefy™ and need the product in two days, the quick and easy option of Amazon will meet their needs; and lastly, for contractors or window installers

attempting a window project that requires a liquid flashing, ordering from Amazon will keep the home improvement project right on time.

For complete information on DensDefy™ Accessories, please visit [www.densdefy.com](http://www.densdefy.com). For more information on Georgia-Pacific Building Products, please visit [www.buildgp.com](http://www.buildgp.com). To find each DensDefy™ Accessories product on Amazon, follow these links:

The Georgia-Pacific DensElement® Barrier System, with AquaKOR™ Technology, integrates the gypsum core and the fiberglass mat to form a hydrophobic, monolithic surface that blocks bulk water, but allows vapor to pass through. The Georgia-Pacific DensElement Barrier System eliminates the need for building wrap, fluid-applied membranes or peel-and-stick membranes. It's faster to install and can be installed when it's wet outside—saving time and labor. The all-in-one Georgia-Pacific DensElement Barrier system is finished with DensDefy™ Liquid Flashing to fill and seal joints, fasteners, openings, penetrations and transitions. The Georgia-Pacific DensElement Barrier System is ABAA listed and WRB-AB approved and has a customized MasterSpec® specification –061656 Air and Water Resistive Sheathing Board.
